Summary

Computer Science undergraduate with experience building full-stack web applications and AI-powered solutions using React, Node.js, and MongoDB. Passionate about software development, problem solving, and building scalable applications.

Projects

NiveshCapital | *Full Stack Stock Trading Simulator – React.js, Node.js, Express.js, MongoDB Atlas, JWT* **Live** | **GitHub**

- Engineered a stock trading simulator with a custom server-side price simulation engine updating 15+ NSE stocks every 30 seconds with realistic market behavior – no external stock API used.
- Built secure JWT authentication with email verification, real-time P&L tracking, Buy-Sell order execution, and complete multiuser data isolation across 6 MongoDB collections.
- Deployed a production-grade app on Vercel and Render with MongoDB Atlas, environment-based configuration, and CORS setup.

Float Chat | *AI-Powered Ocean Data Search Platform – Python, Flask, PostgreSQL, Streamlit, Docker* **GitHub**

- Developed an AI-powered platform enabling natural language search across ocean datasets using Flask and PostgreSQL.
- Built an interactive Streamlit dashboard for data visualization and containerized the application with Docker for deployment.

Technical Skills

Programming Languages: JavaScript, Python, C, C++

Frameworks & Libraries: React.js, Node.js, Express.js

Web Technologies: HTML, CSS

Tools & Platforms: Git, GitHub, Figma, VS Code

Databases and Platforms: MongoDB, Vercel

Concepts: Data Structures & Algorithms

Certifications

Google × Kaggle – 5-Day AI Agents Intensive Course **Credential**

Education

Dayanand Sagar College of Engineering **2024 – 2028**

Bachelor of Technology in Computer Science and Engineering *CGPA: 9.07*

Achievements

- Top 8 Finish, Bytexync Hackathon – Recognized for innovative problem-solving and teamwork among competing teams.
